I'm nahom ketema, a Senior Full Stack Developer & WordPress Expert with a proven track record of building fast, secure, and SEO-friendly digital products. I've led startups, built solutions for NGOs and growing businesses, and successfully launched my own e-learning platforms and AI-powered SaaS products. My work focuses on turning ideas into real, scalable products - quickly and intelligently. For a deeper, behind-the-scenes look at my real-life journey, visit: [Wadeh Life - AJ](#) Available for: - Full Stack Website Development - Mobile App Development - Fast MVPs, PWA, SaaS Products - Wordpress Development - AI-powered automations & integrations

📁 EXPERIENCE

Nile Technology Solution

Startup website with sleek design

niletech.co

this is the portfolio website for Nile Technology Solution tech startup. with company infos.

rent and move

Developed a data-driven research project focused on [rent], using statistical analysis to identify key trends. Delivered a final report that provided actionable recommendations for Target Audience.

Employee Management System

- Designed and developed a scalable employee management application to handle employee data and administrative tasks
- Built RESTful APIs with Node.js and Express to support efficient data operations
- Implemented secure authentication and role-based access control
- Structured relational/non-relational database for optimized data storage and retrieval
- Applied MVC architecture for clean and maintainable code
- Version-controlled the project using Git and GitHub

Bus Ticket Booking System

- Designed and developed a backend-driven Bus Ticket Booking System to manage routes, schedules, and passenger reservations
- Built **RESTful APIs** using **Node.js** and **Express** to handle ticket booking, cancellation, and seat availability
- Implemented **CRUD operations** for buses, routes, schedules, and user data
- Integrated a **database (PostgreSQL/MySQL/MongoDB)** to store and manage booking and user information efficiently
- Developed **seat management logic** to prevent double booking and ensure real-time availability

★ MY TOOLS:

- Fast MVPs, PWAs & SaaS products (React, TypeScript, Firebase, Supabase, Lovable)
- Full stack web applications (Next.js, React, Vue.js, Node.js, (Nest js))
- Mobile app development (flutter)

- Implemented **authentication and authorization (JWT)** to secure user accounts and booking operations
- Added validation and error handling to improve system reliability and prevent invalid transactions
- Used **Git and GitHub** for version control and project management

Tech Stack: Node.js, Express, Database (PostgreSQL/MySQL/MongoDB), REST API, JWT
